

Rat Birth Control

Stop rats before they multiply.

Active Ingredients:

Cottonseed Oil0.1%

Other Ingredients 99.9%

Oat Flour, Vegetable Shortening,
Sucrose, Cottonseed Meal, Citric Acid

Total: 100.0%

FIRST AID

If on skin: Take off contaminated clothing. Wash with plenty of soap and water.

If in eyes: Rinse cautiously with water for several minutes.

If ingested: Do not induce vomiting. Call a poison center or doctor if you feel unwell.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION. Contact with eyes may cause irritation. Wash hands thoroughly after handling.

PERSONAL PROTECTIVE EQUIPMENT:

Wear protective gloves and clothes. Safety glasses recommended.

TREATMENT FOR PET INGESTION:

If animal consumes bait and adverse effects are observed, call a veterinarian.

Keep Out of Reach of Children

CAUTION

Net Contents: 1-40 lb. (0.5-18 kg)

Contains: approx. 14-550 pieces

DIRECTIONS FOR USE

READ THIS LABEL: Follow all use directions and use precautions. Use only for sites, pests, and application methods described on this label.

USE RESTRICTIONS: **1.** Bait must not be deployed in areas where contamination of food, water, or surfaces that come in direct contact with food is possible. **2.** Do not dilute or add anything to the product. **3.** Store and deploy bait out of reach of children, pets, domestic animals, and non-target wildlife or in tamper-resistant bait stations. **4.** Dispose of product container, unused, and unconsumed bait as specified on this label.

SELECTION OF TREATMENT AREAS: This product is for use in commercial, residential, and agricultural sites. Place bait in high-traffic areas or where you see signs of rat activity. Potential treatment areas: near foraging sources (e.g., trash, gardens, vegetation, food storage, etc.), burrows, or structural openings in the floor, wall, and ceiling.

APPLICATION DIRECTIONS: **1.** Apply 6 to 12 pieces of bait per placement depending on activity levels. **2.** Check bait regularly to ensure a continuous supply. Replenish as needed; frequency will decrease as the population declines. Note: Bait may become oily in warm temperatures – this is normal and does not impact effectiveness. It will resolidify in cooler conditions, and rats love it either way. **3.** Monitor rat activity patterns. Adjust the placement of bait or quantity provided if rat activity shifts due to seasonal changes, construction, or new food sources.

STORAGE AND DISPOSAL

Storage: Store away from water. Store only in original, tightly secured containers in a room temperature environment, inaccessible to unauthorized users, children, pets, livestock, and other non-target animals. **Disposal:** Place product packaging, unused bait, or unconsumed bait in trash.

DISCLAIMER

To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

This product has not been registered by the U.S. Environmental Protection Agency. SenesTech, Inc. represents that this product qualifies for exemption from registration as a minimum risk pesticide under FIFRA Section 25(b).
